

Exclusively Branded Mobile Dialer from Aianna Voipswitch for our resellers and customers - A Winner for Internet Telephony Providers

Features:

- Connectivity is linked thru either Wi-Fi, GPRS, EDGE, 3G - the softphone asks the subscriber to select the preferred method from the list of available (defined on the phone) internet access points. The window with the list of access methods is shown during the softphone start
- Making and receiving SIP calls
- Making and receiving SIP calls from behind any VoIP blockades/firewalls. It uses our proprietary solution called VoIP tunnel which is also used in our Vippie windows edition. Previous softphone SIP link has proved very efficient throughout last 4 years since it was released. VoIP tunnel works efficiently without any problems from countries like UAE and all others where VoIP technology is generally blocked.
- The Native address book from the mobile phone is fully integrated with the Vippie mobile. User can select a contact from the address book and make a call
- Redial button
- Real time call status messages
- Last calls log
- Summary window showing last call cost and duration
- Balance information
- Loudspeaker
- Audio control

The Softphone is fully branded, with provider's name and logo on its interface. Please contact sales@aianna.com for more details.

Aianna is a full service provider for Carriers, resellers, Callshop, Call centers, residential end enterprise.

Aianna thanks you for the support and growth during this last few years.
